Model 1208 Bin Fill Conveyor

Patent No. 6,170,646 & 6,675,958

Patented Cleated Belt

Features:

- Electric, PTO, or hydraulic drive available
- 8" galvanized tube construction
- Complete enclosed return
- 12" patented cleated belt with 1 1/2" cleat on 6" center
- Patented drive configuration
- Cable lift or hydraulic lift optional
- 45' through 65' lengths available
- 2000 pounds per minute/will vary slightly with density change
- 5 bolt highway axles for easy transport
- 40 degrees incline capabilities
- 376' per minute for gentle seed handling
- Minimal cleanout door for ease of changing commodities or varieties
- Collapsible canvas hopper standard
- Galvanized hopper optional
- 1 1/4" shaft for durability and long life with removable bearings for easy maintenance

The goal of KSi Conveyors is to design a conveyor that will outperform conventional augers and conveyors in the speed of material flow, the maximum degree of operation, and material handling. The KSi Seed Conveyor achieves this due to its cleated belt. As a result of the cleats the seed conveyor can move seed more efficiently than conventional conveyors with ability to perform at a 40 degree angle. The cleated belt conveyor handles material gently resulting in very little material damage. With these results the KSi Seed Conveyor proves to be more efficient than conventional augers and conveyors.
