161272UP SWING AWAY CONVEYOR

Features:

- 16" Patented cleated belt with cleats on 6" center
- 12" Galvanized tube construction
- 72' Length
- Galvanized and powder coat painted
- 2" Cleats for maximum performance up to 38 degree incline
- Collapsible hopper
- Low profile hopper with dual hydraulic swing away
- 3250-6700 Bushels per Hour

Patent No. 6,170,646 & 6,675,958

The goal of KSi Conveyors is to design a conveyor that will outperform conventional augers and conveyors in the speed of material flow, maximum degree of operation, and material handling. The KSi Seed Conveyor achieves this due to its cleated belt. As a result of the cleats the seed conveyor can move seed more efficiently than conventional conveyors with ability to perform at a 40 degree angle. The cleated belt conveyor handles material gently resulting in very little material damage. With these results the KSi Seed Conveyor proves to be more efficient than conventional augers and conveyors.
